suitable for alignment (400-700 nm) laser

Certified protection specifications for EN 208

Protection levels

0,01W $2 \cdot 10^{-6}$ J 400 - 700 RB1

PF CE

Properties:

The **STARLIGHT** is a light and elegant laser safety spectacle frame made of a special polymer. This lightweight frame offers a perfect fit, due to adjustable temples, a rubber lip in forehead area, as well as an additional lateral protection by wrap-around-design.

The **Laser Safety Filter 0156** is suitable as an **alignment filter** for low power lasers (up to 10mW). This alignment filter can be used in the complete visible light spectrum from 400-700 nm. Although the VLT is limited, alignment applications will not be affected negatively. The laser safety filter is **CE certified** in accordance with the requirements of **EN 208** and is available in different frames.

For a perfect and safe cleaning of this filter we recommend this [cleaning spray](#).

Please calculate the necessary protection levels for your laser application, with care and compare them to the given protection level of the laser safety goggle. We will gladly advise you on the selection of the right safety gear.
