Properties:

The **SPECTOR** is a multifunctional **laser safety goggles frame**, made from a lightweight aluminium alloy. The laser safety goggles are tightly sealed thanks to a soft, padded face support. Generous ventilation ducts prevent fogging of the glasses. The laser safety goggles can be worn over prescription glasses and the adjustable elastic head band offers perfect wearing comfort even for long working periods.

The Laser Safety Filter 0140 is suitable for powerful **Diode (980 nm), Disk (1030 nm), Nd:YAG (1064 nm), Fiber (976 – 1080 nm), Telecom (1550 nm), Ho:YAG (2100 nm), Er:YAG (2940 nm) and CO2 (10600 nm) Lasers**, but the filter also covers additional laser wavelengths. The laser safety filter consists of a light grey, laminated mineral glass, and offers a high visual light transmission (VLT) of 70% due to its minor filter thickness. The laser safety filter is **CE certified** and meets the demands of the laser safety standard **EN 207**.

For a perfect and safe cleaning of this filter we recommend this [cleaning spray](#).

Please calculate the necessary protection levels for your laser application, with care and compare them to the given protection level of the **laser safety goggle**. We will gladly advise you on the selection of the right **safety gear**.
