

Laser safety eyewear TERMINATOR, Filter: 0249, frame color black

Product information:

Item no.: 000-K0249-TERM-01

Application: Diode (630 – 660 nm) RGB-Laser (450 + 532 + 650 nm) He:Ne (633 nm) Blue light laser (450 – 480 nm) Justierung (EN 208) , VLT (Visible light transmission): 18 %

Filter color: brown

Frame color: black

Filter material: polymer

Properties:

The **TERMINATOR** is a light and sporty **laser safety spectacles** made of a special polymer. This lightweight frame offers a perfect fit, due to a comfortable and soft nose-pad, which can be individually adjusted by the user. Furthermore the temples can be individually adjusted in length and angle. The wrap-around lenses provide perfect side impact protection without confining the field of vision. Ventilation slots between lenses and frame allow an optimized air circulation, which prevents fogging.

The **Laser Safety Filter 0249** is suitable for **protection against laser pointer attacks (RGB)** in particular. The filter also was tested successfully for **Impact Level (F) according to EN166**, and can be used as protection eyewear for police and task forces. The laser safety filter consists of brown polycarbonate, and offers a visual light transmission (VLT) of 18% although its covering a wide range of visible wavelengths. Additionally the filter can be used as alignment filter in several wavelength ranges. The laser safety filter is **CE certified** in accordance with the requirements of **EN 207** and **EN 208** and is available in different frames.

For a perfect and safe cleaning of this filter we recommend this [cleaning spray](#).

Please calculate the necessary protection levels for your laser application, with care and compare them to the given protection level of the laser safety goggle. We will gladly advice you on the selection of the right safety gear.
