

## Window cleaning spray suitable for polymer and glass, 250 ml

### Product information:

Item no.: 970-SPRAY-250ML

Cleaning spray for polymer and glass windows, 250 ml, Anti-fog, Antistatic, Silicone-free, Alcohol-free

## Properties:

The 250 ml window cleaning spray has been specially developed for highly coated and/or mirrored glass and plastic surfaces (except acetates) and is therefore ideal for cleaning **windows**.

This spray can be used to remove fingerprints, dust, dirt and light oil and grease stains without leaving any residue.

It does not cause any clouding or stress cracks and is supplied ready to use.

The cleaning agent also prevents fogging, has an antistatic effect and is silicone and alcohol-free - perfect for keeping your windows in pristine condition.

## Application:

To clean, simply spray the cleaning spray onto the relevant glass or plastic surface, leave to act briefly, carefully remove the dirt with a suitable soft cloth (e.g. **microfiber cloth**) and then polish with.

We advise against the use of other cleaning agents for our products that are not expressly recommended by us and accept no liability.
