

Polymer cleaner, for laser safety windows, 250 ml

Product information:

Item no.: 970-ZUBE-RAS-250

Product weight: 0 g

Antistatic plastic cleaner + maintainer

Properties:

Cleaning agent is no longer manufactured! AS A REPLACEMENT FOR THIS PRODUCT, we recommend

using our **new cleaning spray for glass and plastic surfaces** (ARTICLE NO. 970-SPRAY-250ML)

Polymer cleaner for laser safety windows. Recommended for all polymere windows and goggles from PROTECT-Laserschutz GmbH. The ready-to-use cleaning agent has an antistatic effect and has been successfully tested for chemical reactions and long-term damage.

Application:

To clean, apply the cleaning agent to the corresponding surface, let it absorb briefly and carefully remove the dirt with a suitable soft cloth (e.g. microfiber cloth) and then polish it.

You can also obtain a suitable **microfiber cloth** from us here: [ARTICLE NO. 970-CLOTH-01-PRO](#)

We advise against the use of other cleaning agents for our products that are not expressly recommended by us and accept no liability.
